Description

With the demand for project managers expected to continually expand in the future, the BPS in Project Management is designed to provide students the needed knowledge, skills and capabilities to lead projects in all types of disciplines. Students will explore foundations, organization, leadership, methodologies, controls, communications, and stakeholder management. Aligned with professional credentials in project management, this degree ensures that students will be able to lead project teams successfully, even in a global/virtual setting. A capstone course allows the student to apply the principles of project management to their own chosen discipline.

Student Learning Outcomes

1. Define traditional and emerging project management trends and methods.
2. Apply project management concepts to successfully launch and complete a project.
3. Demonstrate an understanding of the concepts connected to globalization as it relates to the project management of large scale team-based projects.
4. Construct a comprehensive risk management plan to serve as a guide for all risk management action throughout the lifecycle of the project.

Program Requirements

Professional Competencies Core

The Professional Competencies Core covers fundamental knowledge and abilities required in the modern workplace, such as ethics and critical thinking, problem solving, human relations, diversity and change management, budgeting and resource management, and teamwork. The Professional Competencies Core includes an introductory course, and a capstone experience required of all B.P.S. students. Designed to draw together issues from across the entire B.P.S. program, these courses summarize concepts covered in the curriculum and develop students' skills in strategic decision-making that looks to the future.
